Subject: XV™ Control System – New Powder Coat Finish!

This Bulletin Includes Important Product Information

The enclosure on the Kidde XV Control System (P/N 87-120099-001) will soon be arriving with a new white powder coat finish! This new powder coat finish will provide a clean, polished, more aesthetically pleasing look based on feedback from you, our distributors.

In addition to being easy to maintain, the powder coat finish is tough, abrasion resistant and won't crack, chip or peel.

There are no changes to the part number or functionality of the XV Control System. Continue to order P/N 87-120099-001 from the 2009 Price List.

The chrome plated XV Control System will be phased out and the new powder coated XV Control System will begin shipping soon.

We thank you for your continued business!
