

BULLETIN

#16-18K

Date: May 16, 2016
To: All Kidde® Fire Systems Distributors
From: John Smith, Product Manager (Detection & Control)
Subject: New Kidde AEGIS Conventional Control Units

As part of our global unified brand strategy we are pleased to announce the release of the Kidde AEGIS 2.0 and Kidde AEGIS-XLT Conventional Control Units. These Control Units are available for immediate delivery and should be quoted for new projects.

Key attributes and features of these new units include:

- Compatible with Kidde Fire Systems' ADS and ECS Clean Agent, Inert Gas, HPCO₂, Cardox LPCO₂, WHDR Wet Chemical and IND™ Dry Chemical suppression systems.
- Compatible with legacy Fenwal Initiators and Chemetron solenoids.
- AEGIS 2.0, typically intended for Clean Agent applications, encompasses features of the legacy AEGIS and 732.
- AEGIS-XLT, typically intended for LPCO₂ applications, encompasses features of the legacy MICRO XLT and MICRO XLT Ip NEMA 1 control units.
- FM Approved and UL Listed to ANSI 864, 9th edition. CSFM and SASO approvals will follow.
- Listed for use with new 700 Series and legacy CPD-705x ionization, PSD-715x photoelectric, and THD-705x heat detectors.

A list of the AEGIS 2.0 and AEGIS-XLT Control Unit part numbers and the legacy control units they replace is provided in Attachment A. Information about NEMA 4 and 12 offerings will be provided shortly.

In order to support recent bids and service the installed base of control units, we will support legacy units as follows:

- Spare parts will be available through June 2023 unless component obsolescence or discontinuation by the vendor disrupts this plan
- Complete control units will be orderable through July 31, 2016. Shipments must occur on or before August 31, 2016.
