BULLETIN

2021-31K

Date: June 15th, 2021
To: Engineered Systems Distributors
From: Product Management
Subject: Legacy Component Availability

Kidde Fire Systems would like to make all customers aware of the future availability of select legacy products and platforms.

Legacy Inert Gas – Last Time Buy

Select Part Numbers (see Appendix A) within the Legacy Inert Gas product lines will be available for last time buy orders until September 30, 2021 with deliveries scheduled up to October 31, 2021. After September 30, 2021 availability of these products will be limited to on-hand inventory and once inventory is depleted, the products will be discontinued without additional notification.

Legacy Detection and Control – Limited Availability

As part of our global unified brand strategy Kidde Fire Systems (KFS) released the ARIES®-SLX and ARIES-MLX control unit platforms earlier this year. These control unit platforms unify many of the unique features and capabilities of the preceding Kidde Fire Systems, Fenwal Protection Systems and Chemetron Fire Systems control units into a single Kidde Fire Systems-branded ARIES platform.

In further simplifying your ordering, inventory, and support processes, KFS has previously announced the phasing out of many legacy components outlined in Bulletin #2020-08K. Moving forward, equivalent Kidde Fire Systems parts will be used as replacements for most Fenwal, Chemetron and legacy KFS parts required for system service or expansion.

This is the final notification that availability for most Fenwal Protection Systems and Chemetron Fire Systems and some Kidde Fire Systems control units/suppression components/accessories/spares are limited to on-hand inventory and will no longer be available for sale once inventory is depleted.

Please note that the Price List dated June 15th, 2021 available on the [Distributor Extranet](#) contains revised information concerning product replacements and availability.
