

SABO FOAM –New HYDRAL ICAO AFFF Formulations

Dear SABO FOAM distributors and customers,

We are pleased to announce that we have received new Approvals as per International Civil Aviation Organization (ICAO) level B for our SABO FOAM concentrate range:

We are now able to match Airport Emergency rescue Fire trucks and foam supply needs, as we now have the mandatory approvals required for this special Crash rescue application High Performances requests.

- o The new product datasheets are now available from our Website : www.SABOFOAM.com
- o The new Approvals have been obtained from 2 officially accredited Third party Laboratories:
 - CNPP - **HYDRAL S6**
 - FM (Factory Mutual) - **HYDRAL S3**
- o Already available in the range:
 - Lloyds Register - **HYDRAL 1**

Commercial information :

- o **HYDRAL S3:** Carry now both UL-162 and ICAO Level B
- o **HYDRAL S6:** Carry ICAO Level B
- o **HYDRAL 1:** Carry EN1568 / IMO and ICAO Level B
- o The logo on the Top right has been designed and added into our data sheets to clearly highlight the Crash rescue Airport application **Level B**.

Ordering information:

Approvals	P/N	Designation
